HARVEST OF THE MONTH

Cantaloupes are characterized by their pastel colored skin and bright orange fruit inside. They are mild flavored and full of nutritional benefits. Cantaloupes contain high levels of potassium which help our metabolism and chemical balance. A fresh fruit salad must contain this fantastic fruit! Cantaloupes contain a well-rounded nutrient base and are a great addition to any diet. Stop by our cafés to try cantaloupes when they are at their ripest.

SLA Management is sensitive to the needs of students with disabilities and will make every reasonable effort to accommodate students with disabilities so they can enjoy school lunch. If your child has a medical condition that may be affected by eating school lunch, please contact your school's office for a Diet Modification form. In spite of our every effort, we cannot be absolutely certain that contaminants have not been introduced to products prior to their receipt, or preparation facilities used by a third party while not under the supervision of SLA Management.

This institution is an equal opportunity provider and employer.
